PRE-ORDER FORM

The Prairie Garden 2019 Edition "Growing Food"

Arriving late February 2019

The next *Prairie Garden* will focus on today's biggest trend in gardening: growing our own food. These days, people want food that's fresher and tastier than anything they can buy at a supermarket, and they don't want it to come from far away. So our very own patch of Earth, no matter how small, is where it's happening! Over 50 articles by gardening experts will cover all aspects of growing food in our region, including heirloom tomatoes and vegetables, perennial edibles, miniatures and container planting, prairie-hardy fruits, raised bed and permaculture techniques, wild foraging, and new ways of preserving the harvest. Our guest editor, community garden organizer and specialty grower Tiffany Grenkow, is making sure that everyone from environmentalists to gourmet chefs will find something to interest them.

The Prairie Garden 2019 Edition "Growing Food" retail price - \$17.95

ISBN 978-0-9939559-4-5
